

COOKIES POLICY

A Cookie is a small file, typically of letters and numbers, stored on to your computer or mobile device which allows the originating website to recognise a user's device. Cookies are commonly used by websites in order to store things such as preferences and to learn what interests users. We only use essential cookies and anonymous web analytics cookies, provided by Google, Inc., in order evaluate how visitors use our site to help us provide you with a better online experience. This information is used for internal purposes only and we do not collect any personal data. You can change your Cookie settings.
